YTTC Yoga Meditation Diploma Course with Michael McCann

PROSPECTUS

“Know thyself” (Delphic Oracle)

Meditation is a state of being, not just something you do. It is all about being true to who you really are, being aware, and being in the now. It is not an escape to a pleasant and blank inner oasis of thoughtlessness. It is a journey of self-discovery which continues throughout life. While meditation is a state of being, there are many methods and techniques to help you attain that state. However, ultimately it is about finding out who you are, understanding the working of the mind and developing the heart.

That way, you can help take others on the journey- be they seekers, students in your Yoga class or anyone who wishes to learn or to teach methods of meditation. The course will be integrated and holistic and will teach you how to develop a meditation practice for yourself, but, importantly, how to impart it to others. You will learn how to introduce and develop the teaching of meditation techniques, whether it be to deal with stress and promote relaxation; or in the hustle and bustle of life to find a centre of space and stability and promote self-understanding. However, in the end it has to be more than that.

The course will draw upon a mixture of traditions and ways to understand the mind, to open the heart and to help you discover who you really are. It will be underpinned by wisdom teachings and practices, but ultimately it will be existential. It will point the way, but each must tread the path alone, a path with heart.

The Buddha was once asked by a passer struck by his radiant presence, whether he was a God, a celestial being, or indeed simply a man. He answered “no” to all these questions. When asked, then, what he was, he replied “I am awake”. The path of meditation is the path of awakening, so that others may awaken too from their slumber. “When one flower is in bloom, it is summer everywhere”.
